

YOUNG PEOPLE MARCHING

(for Greta Thunberg)

words and music by Raffi

© 2019 Homeland Publishing

**Young people marching / striking for climate
Millions and millions of young people marching
Marching for our planet / marching for their lives**

**Young people speaking their truth to power
The science is clear, it's late in the hour
For climate action, reducing GHGs**

**Decades of lies, decades of denial
Turned up the heat, engulfed us in fire
Decades of obstruction, though people knew better
Caused this climate emergency, now we gotta set ourselves free
Of this climate emergency —climate emergency**

**Young people dreaming, a clean new economy
A Green New Deal, keeping it real
Young people calling out, extinction rebellion**

**Greta Thunberg in Sweden got everybody marching
Now millions are marching the whole world over
Young people marching, marching for our lives**

**Young people marching / striking for climate
Millions and millions of young people marching
Marching for our planet / marching for our lives
Young people marching—they're marching for our lives!**
